

CURRENT PLAN, SUPERIMPOSED OVER GHOSTED IMAGE OF 2010 PLAN FOR REFERENCE

The 2010 Erie Canal Area Master Plan identified several desired elements for the project area, however it would be unrealistic to complete all of these projects right away, as such this funding request focuses on some of the core aspects to create a foundation for future amenities.

The orange dashed area represents the focus for this project, however areas outside of this area will be included in the archeological survey, topographic and boundary survey and grading plan. Site work will include erosion control, stormwater control, clearing and grading, invasive species removal, construction of trails, wetland platform, pavilions, seating areas, installation of signage, lighting, site amenities, and plantings.
